Hi Team,

I completed a full round of testing for the TRJ Hardware BLE and NFC functionalities on both iOS and Android devices, along with UWB sanity testing.

Test Environment:

- **Platforms:** iOS and Android
- **Phones Used:** iPhone 16, iPhone 14 Pro, Pixel 6 Pro, Pixel 7 Pro
- **OS Versions:** iOS 27+ and Android 17
- **Hardware:** TR Hardware (BLE/NFC)
- **Setup:** Mock setup

Please find the test summary table below
1. Android

Device	Android							
Test cateogory	**Total Test cases**	**PASS**	**FAIL**	**NT**	**NA**	**NA-Platform**	**Test Coverage %**	**Pass %**
Ownerpairing NFC	40	18	3	19	0	0	52.5%	
Ownerpairing BLE	54	7	2	35	0	0	16.7%	
Authentication NFC	82	29	2	42	0	0	37.8%	
Authentication BLE	41	15	0	26	0	0	36.6%	
Friend Registration NFC	16	8	1	7	0	0	56.3%	
Friend Registration BLE	14	7	0	7	0	0	50.0%	
Key Management NFC & BLE	35	21	7	5	0	5	93.3%	
Stress Tests	35	0	0	0	0	0	0.0%	
Performance Tests	0	0	0	0	0	0	0.0%	
Total	317	105	15	141	0	5	38.5%	87.5%

2. iPhone

Device	iPhone							
Test cateogory	**Total Test cases**	**PASS**	**FAIL**	**NT**	**NA**	**NA-Platform**	**Test Coverage %**	**Pass %**
Ownerpairing NFC	40	16	4	20	0	0	50.0%	
Ownerpairing BLE	54	13	2	33	0	0	27.8%	
Authentication NFC	82	21	3	51	1	0	29.6%	
Authentication BLE	41	15	0	26	0	0	36.6%	
Friend Registration NFC	16	7	1	7	0	0	50.0%	
Friend Registration BLE	14	7	0	7	0	0	50.0%	
Key Management NFC & BLE	35	21	7	5	0	5	93.3%	
Stress Tests	35	0	0	0	0	0	0.0%	
Performance Tests	0	0	0	0	0	0	0.0%	
Total	317	100	17	149	1	5	37.6%	85.5%

Please find below the list of issues identified during testing.

List of Issues:

Sl.no	Test Description	Android	iPhone	Bug-ID
1	Verify NFC polling stops if no NFC device is detected within 30 seconds.	Fail	FAIL	**TTRJ-254**
2	Verify normal flow of Owner Device Key Registration Phase 3.	PASS	FAIL	**iPhone Behavior**
3	Verify normal flow of Owner Device Key Registration Completion Phase4	FAIL	FAIL	**TTRJ-366**
4	Verify behavior during Standard Transaction timeout in Phase4.	FAIL	FAIL	**TTRJ-285**
5	Verify Owner Device Key Registration Completion flow with KTS verification (Phase 4) [Req: DK_F_REQ_BLE_OWN_DEV_KEY_REG_COMPLETE_001]	FAIL	FAIL	TTRJ-300
6	Verify Re-Owner Pairing to 2nd Phone is possible after pairing first phone	FAIL	FAIL	TTRJ-364
7	Immediate authentication on auth failure.	FAIL	FAIL	TTRJ-264
8	Fast Transaction when phone is switched off	FAIL	NT	TTRJ-302
9	Verify if the subsequent transactions for friend is success [Req: DK_F_REQ_NFC_FKR_ATT_004]	FAIL	FAIL	**TTRJ-365**
10	Verify termination of a Friend Digital Key from the owner's device.	FAIL	FAIL	TTRJ-367
11	Verify termination of one Friend Digital Key from owner phone, does not affect another Friend Digital Key.	FAIL	FAIL	TTRJ-368
12	Verify termination of multiple Friend Digital Keys in a single session.	FAIL	FAIL	TTRJ-369
13	Verify Digital Key removal after clearing the wallet application's storage.	FAIL	NA	TTRJ-370
14	Verify a Digital Key does not reappear after signing in again following storage clearance.	FAIL	NA	TTRJ-371
15	Verify termination of a Friend Digital Key from the owner's device.	FAIL	FAIL	TTRJ-367
16	Verify Friend Digital Key termination by the owner while the friend phone is offline.	FAIL	FAIL	TTRJ-367

The failed test cases, along with their logs, have been raised in Jira.

The **TestReport** is attached for your reference:

15_10_26ThinkSeed_Software_Qualification_TestCases_TRJ Platform_1.4.0

Thanks, Regards

Hi Team,

Today, I tested the TR Hardware BLE functionality on both iOS (iPhone) and Android devices.

Test Environment:

- **Platform:** iOS and Android
- **Phones Used:** iPhone 13 mini, iPhone 14 pro, Pixel 6 pro, Pixel 7 pro
- **OS Versions:** iPhone Version (27+), Android Version (17)
- **Hardware**: TR Hardware (BLE)

Please find the test summary table below, along with the list of issues identified during today's testing.

Device	**Android**							
Test cateogory	**Total Test cases**	**PASS**	**FAIL**	**NT**	**NA**	**NA-Platform**	**Test Coverage %**	**Pass %**
Ownerpairing NFC	40	18	3	19	0	0	52.5%	
Ownerpairing BLE	54	6	2	32	0	0	14.8%	
Authentication NFC	82	28	4	42	0	0	39.0%	
Authentication BLE	41	11	0	25	0	0	26.8%	
Friend Registration NFC	16	8	1	7	0	0	56.3%	
Friend Registration BLE	14	5	4	8	0	0	64.3%	
Stress Tests	35	0	0	0	0	0	0.0%	
Performance Tests	0	0	0	0	0	0	0.0%	
Total	282	76	14	133	0	0	31.9%	84.4%

Device	**iPhone**							
Test cateogory	**Total Test cases**	**PASS**	**FAIL**	**NT**	**NA**	**NA-Platform**	**Test Coverage %**	**Pass %**
Ownerpairing NFC	40	16	4	20	0	0	50.0%	
Ownerpairing BLE	54	9	2	28	0	0	20.4%	
Authentication NFC	82	20	4	51	0	0	29.3%	
Authentication BLE	41	11	0	25	0	0	26.8%	
Friend Registration NFC	16	2	8	6	0	0	62.5%	
Friend Registration BLE	14	5	1	8	0	0	42.9%	
Stress Tests	35	0	0	0	0	0	0.0%	
Performance Tests	0	0	0	0	0	0		
Total	282	63	19	138	0	0	29.1%	76.8%

List of Issues:

1. The re-owner pairing to the second phone is not possible after pairing the first phone - **BLE**.
2. The Owner Device Key Registration Completion flow with KTS verification (Phase 4) failed - **BLE (iPhone & Android)**.
3. BLE Owner Key Auth Failed - **BLE**.

The issues identified above have been logged in Jira, along with the relevant logs.

Thank you, Regards.
